- Assisted with video editing, including creation of graphic effects, transitions, and other digital assets in Adobe Premiere
- Shot on-site interviews, transported equipment, and assisting with establishing shot composition and lighting of sets

Education

Drexel University - B.S. in Animation and Visual Effects

University of Pennsylvania Full-Stack Coding Certification

Web Development Projects

❖ [TravelCheck](#)

- A simple and intuitive advisory application to help world travelers determine if their destination is safe to travel to. Uses Javascript, REST APIs, and the Material CSS framework.
- [Github Repository](#)

❖ [IVDB](#)

- MERN-stack website that utilizes the RAWG Game Database API. Supports user profiles for saving separate lists of games, as well as browsing and searching for individual titles.
- [Github Repository](#)

❖ [AutoAuction](#)

- A full-stack auction application designed for selling automobiles over the web. Deployed with Heroku and MySQL, uses user authentication to create and secure user accounts, as well as for listing and betting on cars. Visuals and layout designed utilizing Tailwind CSS, jQuery, and Express.js
- [Github Repository](#)

Skills

- Programming Tools: JavaScript, Python, Java, PHP, SQL, Git
- Web Development Resources: HTML5, CSS3, NPM, Drupal, Node.js, Express, Heroku, React, MongoDB
